Program Date: November 3, 2022
Release as Enduring Date: November 10, 2022
Expiration Date: November 10, 2025

Presenters:

ON-DEMAND- **Anna Veach, DO** Maine-Dartmouth Family Medicine

- Osteopathic Manipulation Therapy (OMT) is widely used for treating orthopedic injuries as well as chronic conditions. More recently, it has been used in the treatment of concussions to improve symptoms and reduce time lost.

- As athletic trainers, we need to be aware of how this therapy can be integrated into our practices and understand the benefits and limitations of this treatment for our patients. This program will cover what OMT is, who can use it, and when it is beneficial to refer and athlete for OMT.

Objectives:

- Differentiate between DO, MD, chiropractic and craniosacral treatments.
- Identify key elements of what Osteopathic medicine is and when to refer.
- Evaluate when concussion symptoms persist and explain when to consider OMM/OMT.
